Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-41, drawn to a packer fluid and a related well bore fluid.

classified in class 507, subclass 926.

II. Claims 42-50, drawn to various well treatment methods, classified in class

166, subclass 244.1.

III. Claims 51-56, drawn to various kits, classified in class 206, subclass 223.

Inventions I and II are related as product and process of use. The inventions can

be shown to be distinct if either or both of the following can be shown: (1) the process

for using the product as claimed can be practiced with another materially different

product or (2) the product as claimed can be used in a materially different process of

using that product (MPEP § 806.05(h)). In the instant case, the fluids could be used for

treating well bores without a casing or in drilling.

Inventions II and III are related as product and process of use. The inventions

can be shown to be distinct if either or both of the following can be shown: (1) the

process for using the product as claimed can be practiced with another materially

different product or (2) the product as claimed can be used in a materially different

process of using that product (MPEP § 806.05(h)). In the instant case, the kits could be

used in treating well bores without a casing or in drilling.

Application/Control Number: 10/695,916

Art Unit: 1712

Inventions I and III are related as apparatus and product made. The inventions

Page 3

in this relationship are distinct if either or both of the following can be shown: (1) that the

apparatus as claimed is not an obvious apparatus for making the product and the

apparatus can be used for making a different product or (2) that the product as claimed

can be made by another and materially different apparatus (MPEP § 806.05(g)). In this

case, the fluids may be made by methods using a kit with 3 packages, each containing

only one of the main components of the product fluid and where required to make the

product, at least one also containing well bore fluid.

Because these inventions are distinct for the reasons given above and have

acquired a separate status in the art as shown by their different classification, restriction

for examination purposes as indicated is proper.

2. This application contains claims directed to groups of patentably distinct

species of the claimed invention.

Species Group I: capping fluids.

Species Group II: corrosion inhibitors.

Species Group III: scale inhibitors.

Species Group IV: salt inhibitors.

Species Group V: oxygen scavengers.

Species Group VI: de/non-emulsifiers.

Species Group VII: biocides.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for

each of the seven groups given above for prosecution on the merits to which the claims

shall be restricted if no generic claim is finally held to be allowable.

Applicant is advised that a reply to this requirement must include an identification

of the species that is elected consonant with this requirement, and a listing of all claims

readable thereon, including any claims subsequently added. An argument that a claim

is allowable or that all claims are generic is considered nonresponsive unless

accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration

of claims to additional species which are written in dependent form or otherwise include

all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims

are added after the election, applicant must indicate which are readable upon the

elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably

distinct, applicant should submit evidence or identify such evidence now of record

showing the species to be obvious variants or clearly admit on the record that this is the

case. In either instance, if the examiner finds one of the inventions unpatentable over

the prior art, the evidence or admission may be used in a rejection under 35

U.S.C. 103(a) of the other invention.
